PROJECTS

Bienes Raices
https://bienesraices-c.netlify.app
Bienes racies it's real state agency project created with html and css, this it's one of my first projects, allows me to improve my css skills using flexbox and css grid

Netflix Clone
https://netfli-clone-r.netlify.app
The Netflix clone was a great challenge for me, because it's very different to another project that i've created before,a lot of technologies was involved. This projects it's build with React, styled-components, firebase as database, use compound component,fuse for the live research, react-hooks and react-context for update the state of the application

Slick's Slices
https://slick-s-slice.netlify.app/
Slick's slices it's a website for a pizzeria created with Gatsby,styled-components, some headless functions,custom hooks for the validation, graphql for fetching the data from the CMS, i use sanity as cms in this projects. Gatsby a framework of react-js
